

Safe Area
82x120 mm

Card Edge
88x126 mm

All important information should fit within the safe area (82x120mm)

During any normal printing process slight shifts called "drift" can occur. Keeping the main elements of your image within the "Safe" area will insure that it will appear properly centered.

Bleed Area
94x132 mm

A light frame will help blend the space from the safe area edge into the bleed area.

***Your image should measure
94 x 132mm total***

**Finished images should be
300dpi, JPEG, PNG or PDF
assistance available if needed**
